

Jet Yard chooses Quantum Control MRO and Logistics Software to enhance inventory control and reporting

ORLANDO, FL, MRO AMERICAS, April 25, 2015 – [Component Control](#) announced today that [Jet Yard, LLC](#), an FAA 145 Repair Station that specializes in end-of-life solutions for aircraft, selected [Quantum Control](#) MRO and Logistics software to enhance its inventory control and reporting.

“We chose Quantum because of its versatility and ease of use. We plan to implement it across all phases of our business, including aircraft disassembly and part sales,” said Tim Zemanovic, general manager of Jet Yard.

Jet Yard’s 56-acre Pinal Airpark storage complex in Marana, Arizona includes aircraft storage, 112,000 square feet of concrete ramp space for maintenance and disassembly services, and a 20,000-square-foot warehouse. At its headquarters in Minneapolis, Minnesota, Jet Yards stocks aircraft parts sourced from teardown projects in its 5,000-square-foot warehouse.

Jet Yard provides aircraft maintenance services to Boeing, Delta Air Lines, Delta Material Services and more than 100 other companies worldwide. The company recently signed a five-year agreement with Delta Material Services to part out its aircraft, starting with a Boeing 737-700. The parts will be used to support Delta Air Lines’ fleet of aircraft. Jet Yard also purchased 14 aircraft from Delta Air Lines for recycling.

Jet Yard maintains the highest level of parts security with documentation to support traceability and future tracking of all parts in the aftermarket. In support of that mission, Quantum Control allows Jet Yard to easily track dozens of harvest aircraft and thousands of parts across multiple facilities.

“We are seeing better accountability throughout our entire inventory system. Quantum provides better reporting, and it’s a great way to store all of the parts data and photos in one place,” said Zemanovic. “Our aircraft disassembly process has improved, which has resulted in better customer service.”

[Quantum Control](#) is a fully integrated business software solution. Developed specifically for aviation MRO and Logistics organizations, it promotes best practices and improves business processes with a single database integrated solution that can be flexibly deployed as a dedicated in-house system, or be hosted via a third-party cloud. Quantum Control's personalized configuration settings provide individual users with an intuitive interface that improves the bottom line through optimized productivity. As a powerful, affordable and scalable solution, Quantum Control extends across the supply chain using its built-in web services fully integrated with www.StockMarket.aero.

The Quantum Control MRO and Logistics solution installed at Jet Yard operates on a highly scalable and secure Oracle™ database and includes a range of logistics and business modules. For details on the specific modules chosen by Jet Yard, see appendix one below.

For more information on Quantum Control, visit the Component Control team at [MRO Americas](#), April 25-27 in Orlando, Florida, booth 1208. For more information on Jet Yard, visit booth 4043.

About Jet Yard

Based in Burnsville, Minnesota, Jet Yard operates an FAA Part 145 Repair Station located at Pinal Airpark (KMZJ) in Marana, Arizona. The facility provides aircraft storage and parking along with partout, disassembly, demolition and recycling services for aging aircraft and engines. At its Minnesota location, Jet Yard maintains a large inventory of parts harvested from aircraft and engines purchased by Jet Yard. All parts are removed and tagged by experienced FAA licensed Airframe and Powerplant Technicians. For more information, visit jetyard.com.

About Component Control

Component Control, based in San Diego, California, is a leading developer and provider of MRO and Logistics Software solutions for the aviation industry. Its core product, Quantum Control, provides advanced aviation management support to original equipment manufacturers, aftermarket service divisions, component repair and overhaul companies, fixed base operators, aircraft completion centers, airlines, MRO facilities, and part distribution/redistribution companies. Quantum is installed in more than 50 countries and can be deployed as a single-site or multinational solution.

Stockmarket.aero, also from Component Control, is an online aviation parts trading marketplace giving users access to a comprehensive search engine that includes parts in stock, MRO capabilities and part alternatives. StockMarket.aero currently lists more than 100 million qualified line items of inventory and capability from over 3,000 aircraft parts vendors.

Component Control won the 'Best IT Software Provider' category in the Aircraft Technology Engineering and Maintenance Awards.
